Meetings with [redacted] STAT

30 June

Early this day, he showed me a copy of a proposed study of the name check function in the DD/P. I was permitted to briefly scan the proposal and remember that the following was involved:

(1) The complete centralization of the name check function in RI.
(2) The assignment of 14 additional slots to RI to perform the complete function.
(3) The complete centralization of records in RI to do the job.

I was asked to take on the assignment immediately. I indicated that I was not so inclined, particularly not in your absence. He subsequently visited with [redacted] and reported back that I was STAT
to handle the assignments. I suggested that both of us visit
STAT [redacted] so that I might get the assignment directly from him. Lou agreed, but he did not have time then.

1 July

Early this day, I was asked when I would be ready to go to work on my assignment. Again I reminded him that we were to visit
STAT [redacted] together. He was again too busy.

2 July

Same as previous day

6 July

The same subject was discussed and it was agreed that the development of any details re the assignment would be delayed until your return to duty.

My comment

You are aware of my interest in this subject. You are also aware that it is not a new problem with the DD/P that has to be solved today. The need for the development of detailed plans for conducting such an involved study far overshadows the element of time.

[redacted] STAT
